AMENDMENTS TO THE CLAIMS

The listing of claims presented below replaces all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-21 (Canceled).

Claim 22 (Currently amended): The resin composition as claimed in claim 21,

A resin composition comprising a biodegradable resin and an organically modified layered

silicate, the organically modified layered silicate comprising a layered silicate and a

substituted silyl group, the substituted silyl group bonding to the layered silicate and

comprising a substituted or non-substituted alkyl group, and the layered silicate comprising a

silanol group on a surface thereof,

wherein the substituted silyl group further comprises a substituent selected from the group consisting of an amino group, an epoxyethyl group, an epoxyethyloxy group, a vinyl group, an isopropenyl group, a 1-phenylvinyl group, a 4-vinylphenyl group, an isocyanate group, and a hydroxyl group and the substituent directly bonds to a silicon atom of the substituted silyl group, and

wherein the number of carbon atoms in the alkyl group is 3 or greater and 18 or less.

2

Claim 23 (Currently amended): The resin composition as claimed in claim [[21]] 22, wherein the biodegradable resin is a polyester-based resin.

Claim 24 (Previously presented): The resin composition as claimed in claim 23, wherein the polyester-based resin is poly(lactic acid).

Claim 25 (Currently amended): A resin molded object, wherein the resin molded object is obtained by molding the resin composition as claimed in claim [[21]] 22.

Claim 26 (Canceled).

Claim 27 (Currently amended): The resin composition as claimed in claim 26, A resin composition comprising a biodegradable resin and an organically modified layered silicate, the organically modified layered silicate comprising a layered silicate and a substituted silyl group, the substituted silyl group bonding to the layered silicate and comprising a substituted or non-substituted alkyl group, and the layered silicate comprising a silanol group on a surface thereof,

wherein the substituted or non-substituted alkyl group is a substituted first alkyl group, the substituted first alkyl group comprises a substituent selected from the group consisting of an amide linkage, an ester linkage, an N-oxymethyleneamino group, and an N,N-di(oxymethylene)amino group, the substituent bonds to a terminal of the first alkyl group, and the substituent comprises a non-substituted second alkyl group, and

Serial No. 10/580,336 Response to Office Action Dated 05/27/2010 Page 4 of 14

wherein the total of the number of carbon atoms in the first alkyl group and the number of carbon atoms in the second alkyl group is 3 or greater and 18 or less.

Claim 28 (Currently amended): The resin composition as claimed in claim [[26]] 27, wherein the biodegradable resin is a polyester-based resin.

Claim 29 (Previously presented): The resin composition as claimed in claim 28, wherein the polyester-based resin is poly(lactic acid).

Claim 30 (Currently amended): A resin molded object, wherein the resin molded object is obtained by molding the resin composition as claimed in claim [[26]] 27.
